

Training and Professional Learning

The KiDS Professional Learning Team will assist with onboarding users in navigating the KiDS platform, highlighting features, and defining metrics. In addition, we will provide additional targeted Professional Learning aligned to specific job type, site monitoring team, or grade level needs.

The KiDS Professional Learning team is committed to working with onboarding districts to build capacity around the KiDS platform. Our goal is that the platform would ease the heavy lift of data monitoring and collection necessary for educators to support positive outcomes for students. Training is vital to onboarding and implementation. The Professional Learning team is eager to begin planning and scheduling training for all our partner districts.

KiDS compiles, cleans and completes student data into one system that delivers intuitive insights and creates a collaborative path to positive student growth and outcomes.

These Professional Learning Opportunities are now available and ready to implement:

Getting Started with Essentials and Classroom– This module is an introduction to the KiDS platform. Locate and learn about the various dashboards and tools. This training is for all KiDS users and will get users excited about all the possibilities. The Classroom Module was designed for teachers to monitor how students are doing in their classroom. A whole child approach that highlights more than just academics. A great resource for quickly learning about new students and a valuable tool for parent-teacher conferences. *Suggested users: Administrators, Teachers, Academic Coach, TOSA, Support Staff Positions, Professional Development Trainer.*
Registration: <http://www.hyperlink here>

EWIS-Early Warning Intervention System is a game-changer. Identify at-risk students using KiDS predictive analytics. This dashboard is powerful. Districts can design or gather their already created interventions in one place and monitor the impact on student success. Whether you are supporting academics, attendance, or behavior this tool makes keeping track of student interventions easy. *Suggested users: Administrators, Intervention Specialists, Academic Coach, Professional Development Trainer, School Psychologist, MTSS leader.* **Registration:** <http://www.hyperlink here>

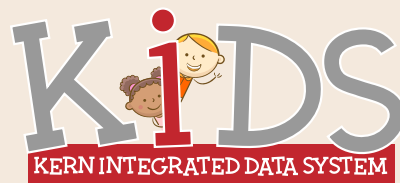

Student Success– A Dashboard for High Schools only. Learn how to access graduation trends data and determine whether a student is on or off track for graduation. *Suggested users: School Counselors and Administrators.*
Registration: <http://www.hyperlink here>

Human Capital and Operations– Depending on permissions granted by district leadership, this module provides data that inform staffing and finance decision making. *Suggested users: Determined by Superintendent.*
Registration: <http://www.hyperlink here>

The KiDS team recognizes that each district and school is unique in the type of training required for implementation. The professional learning team will help identify positions or groups within your organization that would benefit from training in KiDS. We can provide side-by-side continuous support to ensure that key individuals possess the skills and knowledge necessary for full implementation.

Take a deeper data dive with extended professional learning support available for LCAP teams, School Plan and Professional Learning Communities.

We value the partnership that we have with all our participating districts. Please contact the KiDS team to schedule your training pathway.
